

Consumables

Silent deconstruction tools and drum cutters
Edition 2022/2023

**Epiroc consumables and wear parts
are the right choice when maximum
output and low lifecycle cost are in
focus of your daily work.**

All Epiroc Customer Centers and their network of business partners offer a wide range of wear parts and consumables. The staff is trained to support with advice and technical assistance to get the right parts for every application.

Increased productivity

Only genuine parts fit exactly to the stresses that an Epiroc product is exposed to in its daily work. And only original parts enable the owner to minimize downtime and to protect the investment. Only a working attachment tool can contribute to productivity of your company. Let it work!

Low lifecycle cost

Two thirds of the total cost of a hydraulic breaker is operating cost. The purchase price of a breaker causes only one third of the total lifecycle cost. Why not focusing on the more costly part when it comes to a purchase decision?

A smaller breaker on a smaller carrier with a clever maintenance concept and – of course – reliable and robust consumables: that's the recipe for your success.

Get the best out of your machine:

- low lifecycle cost
- less downtime
- increased productivity
- the right tool for every application

Picks

Your application – our solution

Pick boxes and retaining clips ...

Epiroc rotary drum cutters work under extremely hard conditions in trenching, demolition, rock excavation and tunnelling, in steel mills as well as in other unusual applications. This puts very high demands on the cutter drums and cutting tools.

The result of many years of experience, with machines working in thousands of applications around the world, can be seen in the type of picks used and their cutting pattern on Epiroc equipment. This unique combination provides maximum productivity with minimum wear, ensuring the economical performance of Epiroc drum cutters even in the hardest conditions. Modern technology and continuous product development are the basics for ensuring the economic benefits of using our drum cutters and cutting tools.

In addition to alternative design cutter drums, we also offer a large variety of pick types even for unusual applications.

In our range of cutter picks, we have paid special attention to the optimum shape, high quality materials and sustainable quality of the production process. This helps you to keep your consumable costs to a minimum.

... for Epiroc rotary drum cutters and cutting wheels

This catalogue should provide an overview of our standard range of cutter tools, pick boxes and retainer clips, suitable for a wide range of applications.

If you have an extremely unusual application or requirement, don't hesitate to contact us. Our specialists are pleased to provide advice and support in your search for the most suitable cutter tools.

1

2

3

For each model of drum cutter,
Epiroc offers a range of pick types
allowing the best possible solution
for each application.

For example:

ER 15/90/70/30 1

Narrow pick head with small diameter insert,
for use in soft rock

ER 17/75/70/30 2

Standard pick head with medium diameter insert,
for use in soft to medium hard rock

ER 22/75/70/30 3

Standard pick head with medium diameter insert,
for use in medium to hard rock

4

5

6

**ER 25/77/70/30** 4

Standard pick head with large diameter insert, for use in very hard rock

ER 30/77/70/30 5

Standard pick head with large insert cap, for use in soft to medium hard but abrasive rock

ER 19/75/70/30 6

Standard pick head with medium diameter insert and additional hard facing, for use in medium to hard abrasive rock

Pick boxes and retaining clips

Pick boxes

Pick boxes welded onto the cutter head determine where and how picks penetrate into the rock. The special attack angle ensures a continuous rotation of the pick creating a self sharpening action for the tungsten carbide insert during the cutting action.

The correct angle ensures maximum productivity with minimum wear. Pick boxes are also made from specially heat treated steel and depending on applications, are available with exchangeable wear sleeves.

Retaining clips

Retaining clips ensure that picks do not fly out of the pick boxes. Various types of retaining clips are available depending on pick type and application area e.g. retaining collars for soft rock or circlip type systems for hard rock applications.

For quick and easy exchange of picks, Epiroc offers the **QuickSnap** retaining system, which allows picks to be changed in a matter of seconds. This represents a saving of over 50% in time compared to normal circlip or knock on retainer systems.

**Easier and faster pick changes
with Epiroc QuickSnap**

Non-standard drilling heads with special connector sizes

Optional EBK-R3 drilling heads with SW70 connector

Description	Drilling diameter	Connector size	Drill bit group ¹ (pick types)	Part number
Drilling head EBK-R3	Ø 220 mm	SW70	B + F	3311 0044 83
Drilling head EBK-R3 HD	Ø 220 mm	SW70	B + F	3311 0044 56
Drilling head EBK-R3	Ø 280 mm	SW70	B + F	3311 0054 55

¹ Number of picks varies depending on the drilling head.
Available upon special request only.

Optional EBK-F drilling heads with SW120 connector

Description	Drilling diameter	Connector size	Drill bit group ¹ (pick types)	Part number
Drilling head EBK-F	Ø 830 mm	SW120	A + C	3311 0054 57
Drilling head EBK-F	Ø 1,230 mm	SW120	A + C	3311 0054 58

¹ Number of picks varies depending on the drilling head.
Further drilling diameters upon request.

Optional EBK-RF drilling heads with SW120 connector

Description	Drilling diameter	Connector size	Drill bit group ¹ (pick types)	Part number
Drilling head EBK-RF	Ø 830 mm	SW120	A + C + G	3311 0054 59
Drilling head EBK-RF	Ø 1,230 mm	SW120	A + C + G	3311 0054 60

¹ Number of picks varies depending on the drilling head.
Further drilling diameters upon request.

Lubricants

Tailor made cost savers

Silent deconstruction tools

Epiroc COP grease	0.4kg/14oz	3363 0946 14
Epiroc Free flow grease	12×0.4g/0.88lb	3363 1222 50

Silent deconstruction tools

Epiroc COP grease

Epiroc COP grease is a premium, high-temperature, extreme-pressure grease, that provides excellent wear protection and long life for your Epiroc Combi Cutters (CC), Concrete Busters (CB), MultiGrapples (MG), Bulk Pulverizers (BP) and Demolition Pulverizers (DP).

Epiroc COP grease has excellent mechanical stability, providing high resistance under vibrating conditions. It provides good load carrying capacity and performs well under extreme forces. Epiroc COP grease contains additives preventing wear and corrosion.

Main benefits:

- ⊕ reduces maintenance cost and increases lifetime of our Silent Demolition Tools
- ⊕ improves the oxidation stability and protects the core's internal parts
- ⊕ decreases the need for grease replacements
- ⊕ packaging that meets all needs for easy servicing

Maintenance kits

Maximum performance – every day

Maintenance kits for hydraulic attachments

- ⊕ Our kits include all crucial wear parts needed to carry out a service in accordance with factory specifications.
- ⊕ A detailed list of contents and an exploded view simplify identifications.
- ⊕ The price is most competitive compared to purchasing single items.
- ⊕ One part number simplifies order handling and logistics.
- ⊕ The parts arrive in a solid box offering a proper protection during transport and ease of handling.

For more detailed information, please refer to the spare parts list. Online versions under www.podshop.se/epiroc

WORKING

OVERVIEW

TIMELINE

A close-up, blurred background image of a person's hand holding a smartphone. The hand is positioned on the left side of the frame, with the thumb visible near the bottom. The background is a soft, out-of-focus mix of warm tones, likely from the person's skin and the phone's screen.

HATCON

Next level fleet management

HATCON.

A new level of control.

HATCON (Hydraulic Attachment Tools Connectivity) enables next level fleet management by monitoring operating hours, location and service intervals of your tools. By logging in to My Epiroc, on either your computer or phone, you'll have access to all your data and get notifications when it's time for service. HATCON is available factory mounted or as a retrofit kit for premium range breakers and drum cutters.

The data from HATCON provides a new level of control. Making sure the utilization is evenly distributed, optimizing transport and increasing uptime with pre-planned service stops has never been easier. With connected tools, efficiency and ultimately profitability will increase. The GPS-function is also a good contribution to your anti-theft system.

Epiroc is constantly striving towards giving you the solutions you need to succeed today and the technology to lead tomorrow. By adding HATCON to our offer we want to strengthen your business and help you protect your investment.
